

Battery Chargers (NiMH and NiCd)

1 to 30 Watts

Model 8314

- Constant current charger for 1-12 NiMH / NiCd cells
- For 50mAh to 1Ah batteries
- Max 30V, 60mA, for 1-12 cells
- Thermal fuse in transformer
- Reverse polarity protected

- Short circuit proof
- LED indicates charging
- Size: 75 x 47 x 49 mm

- Constant current charger for 1-10 NiMH / NiCd cells
- For 500mAh to 4Ah batteries
- Adjustable output 50 to 400mA
- Thermal fuse in transformer
- Reverse polarity protected

- Short circuit proof
- LED indicates charging
- Medical approved version available
- Size: 100 x 51 x 63 mm

Model 8714CC

adjustable output

- Reverse polarity protected
- Waterproof version available
- Size: 107 x 67 x 36.5 mm

Model 2246

- Charge control with timer for 4-20 NiMH / NiCd cells
- 0.8A output for 5Ah batteries
- 4.8V to 24V output
- Medical approved (EN60601)
- UL approved (UL 2601-1)

- 570mA fast charger for 2-10 NiMH / NiCd cells
- For 800mAh to 1500mAh batteries
- ΔV sensing interrupts charging when cells are fully charged
- Reverse polarity protected

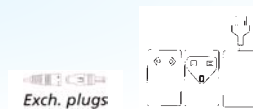

- LED indicates charging
- Thermal fuse in transformer
- Size: 100 x 51 x 63 mm

Model 8715

ΔV charging

- LED indicates charging status
- Size: 100 x 51 x 63 mm

Model 9243

12/24DC input

- DC/DC 700 mA fast charger for up to 12 NiMH / NiCd cells
- For 500mAh to 850mAh batteries
- Max 22V, 700mA, for up to 12 cells
- Switchmode
- 10-30 Vdc input

- Fast charger for up to 12 NiMH / NiCd cells
- Max 30W 1.5 to 3A output
- ΔV sensing interrupts charging when cells are fully charged
- Reverse polarity protected

- LED indicates charging status
- Available in UL 110Vac version
- 9815 medical approved (EN60601)
- Size: 100 x 51 x 63 mm

Model 9315 / 9815

medical version available
